

VGA Driver Installation

1. Installation Instruction:

- a) Login as root
- b) Copy driver file to /var/spool/pkg
- c) #cd /var/spool/pkg
- d) #gunzip -c Naturetech999-x.x+-sol9-sun4u.tar.gz | tar xvf –

where x.x+ is version number.

e) #pkgadd Naturetech999

f) #reboot

Reboot system to take effect!!

This package will set resolution to 1440x900x60 24-bit color depth.

Use "pkginfo" command to verify driver version!!

```
#pkginfo | grep 999platform
```

2. Adjust LCD resolution

Use "fbconfig" (for XVR-100) command to adjust LCD resolution.

```
#fbconfig -res \? (This command could browse all the resolution option supported by the system)
```

```
#fbconfig -prconf (This command could browse VGA setting status)
```

```
#fbconfig -res 1440x900x60 nocheck -depth 24 (This command could set 1440x900x60 resolution)
```
